What is the hazard?	Who might be harmed?	How might people be harmed?	Existing risk control measures		Risk Rating L*C=R		Additional controls		New risk rating (Residual) L*C=R L C R		Action/ By who	Action/ By When
Insufficient provision of PPE	Staff Visitors Volunteers Young People	Increased risk of transmission of COVID-19 Contracting COVID-19, showing symptoms, becoming unwell	Usual PPE identified for tasks under normal circumstances should be adhered to, all staff to review original risk assessments. Face coverings must be worn indoors, alongside face shields if travelling around the building and it is likely you will come into contact with other people. Most young people and workers aged 11 years and over (from the day of their 11th birthday) are required to wear a face covering indoors, including within community and youth centres (legal requirement 24/09/2020) Any personal face	1	5	5	Staff Briefed – following increased infection rates and placement in high tiers locally, disposable surgical standard face masks are available for staff and visitors in the building should they not have their own face coverings. Additionally, staff and contractors are provided with individual reusable visors for use additional to face coverings when travelling in the building.				Facilities Lead Line Managers Line Managers	As per usual procedures and risk assessment Prior to re- open, repeat regularly Prior to re- open, repeat regularly

Notes:

- 1. If using a 'Generic' risk assessment, Assessors and Line Managers are to satisfy themselves that the assessment is valid for the task and that all significant hazards have been identified and assessed. If additional hazards are identified they are to be recorded and attached to the Generic assessment.
- 2. Line Managers are to note that they are appropriately qualified, responsible for production of the risk assessment and that they are signing to indicate that the risk assessment is suitable and sufficient, and they consider the risks to be acceptable.
- 3. When recording the Risk Rating ensure that both the Likelihood and consequence scores are included.

Likelihood (L)	Frequency	Score
are	This will probably never happen	1
Unlikely	Do not expect it to happen but it is possible it may do so	2
Possible	May happen occasionally	3
Likely	Will probably happen but it is not a persisting issue	4
Almost Certain	Will undoubtedly happen, possibly frequently	5

Consequence (C)	Harm	Score
Negligible	Minimal injury requiring no / minimal intervention or treatment	1
Minor	Minor injury or illness, requiring minor intervention	2
Moderate	Moderate injury requiring professional intervention	3
Major	Major Injury leading to long term incapacity / disability	4
Catastrophic	Incident leading to death / life changing injury; an event which impacts many people	5

		Likelihood										
		1	2	3	4	5						
		Rare	Unlikely	Possible	Likely	Almost Certain						
	Level 1	1	2	3	4	5						
nce	Level 2	2	4	6	8	10						
Consequence	Level 3	3	6	9	12	15						
Cor	Level 4	4	8	12	16	20						
	Level 5	5	10	15	20	25						

4. Ensure appropriate action (described below) is taken once the Risk Rating is calculated

1	-2	No Action	No further action, but ensure controls are maintained and reviewed
3	-6	Monitor	Look to improve at next review or if there is a significant change
8	-12	Action	Improve within specified timescale
15	-16	Urgent Action	Take immediate action and stop activity if necessary, maintain existing controls rigorously
20	-25	Stop	Stop activity and immediate action

- 5. Record the residual Risk Rating to demonstrate that the risk has been reduced to an acceptable level; record Likelihood and Consequence scores.
- 6. Risk Assessments are to be reviewed:
- Annually.
- If there is reason to doubt the effectiveness of the assessment.
- Following an accident or near miss.
- Following significant changes to the task, process, procedure, or Line Management.
- Following the introduction of more vulnerable personnel.
- If "Generic" prior to use.
